

3 ways a modern ERP improves employee productivity

On-premises enterprise resource planning (ERP) applications are only accessible to employees working on location. Businesses need tools that are accessible from any device at any time to support a productive, collaborative, and high-outcome hybrid workforce. We are here to help.

3 steps to supercharging productivity

1. Identify bottlenecks

Pinpoint finance and supply chain manual workflows that you can automate through AI.

58% of workers believe that communication is not reaching the frontline²

81% of CFOs believe they suffer the most intensive daily manual work compared to any other role in the C-suite¹

2. Automate workflows

Ensure people stay focused on high-value work with streamlined processes.

82% of companies report AI increases job satisfaction and enhances performance³

3. Leverage reporting and analytics

Activate insights at every level at the organization to make smarter decisions.

\$2T: the expected value of the AI market by 2023⁴

86% of companies that implement AI are high-outcome organizations³

We provide companies like yours with the expertise and guidance to work smarter by getting the most out of their ERP technology. Visit our website to learn more about the benefits of unlocking the power of AI with a trusted Microsoft partner.
